The Scotts Deluxe Edgeguard Spreader Settings Chart Explained

How to Use the Settings Chart

The settings chart correlates the type of fertilizer you are using with a numerical setting on your spreader. These settings are typically adjustable via a dial or slider marked with numbers or letters. To use the chart:

1. Identify your fertilizer type (e.g., granular or specific brand).
2. Check the fertilizer bag for the recommended application rate.
3. Find the corresponding setting on the chart for your fertilizer.
4. Adjust the spreader to that setting.
5. Test the spreader on a small area to confirm the coverage.

Fertilizer Types and Corresponding Settings

Different fertilizers have varying particle sizes and weight, which influence how they flow through the spreader. The chart generally categorizes these into:

- * Slow-release fertilizers
- * Fast-release fertilizers
- * Specialty blends (weed control, seed, etc.)

Below is a typical outline of the settings:

Fertilizer Type	Spreader Setting (Number)	Notes
-----	-----	-----
Scotts Turf Builder	4-8	Adjust based on bag instructions
Scotts Starter Fertilizer	3-5	For new lawns or overseeding

| Weed & Feed Blends | 4-6 | Follow specific product instructions |

| Slow-release Granules | 5-7 | For extended feeding period |

| Seed or Lime | 1-3 | Use lower settings for fine particles |

Note: Always verify with your specific fertilizer's packaging for exact recommendations.

DISSECTING THE SCOTT'S DELUXE EDGEGUARD SPREADER SETTINGS CHART

WHAT IS THE SETTINGS CHART?

The Scott's Deluxe Edgeguard Spreader Settings Chart is a reference guide that correlates the type of material (seed, fertilizer, etc.) with the appropriate setting number or position on the spreader's adjustment dial. It often includes:

- * Material type
- * Recommended setting number or dial position
- * Application rate (e.g., pounds per 1,000 square feet)
- * Additional notes or precautions

This chart is typically provided in the user manual, printed directly on the spreader, or available online through Scotts' official resources.

STRUCTURE AND CONTENT OF THE CHART

Most settings charts are organized into a table format, presenting data such as:

Material Type	Recommended Setting	Coverage Area	Notes
---------------	---------------------	---------------	-------

--	--	--	--

Grass Seed	3	2,500 sq ft	Use for light seeding
------------	---	-------------	-----------------------

Fertilizer (slow-release)	4	2,000 sq ft	Avoid over-application
---------------------------	---	-------------	------------------------

Lawn Fertilizer	5	2,000 sq ft	For standard fertilization
-----------------	---	-------------	----------------------------

It's important to note that these numbers are guidelines; actual optimal settings may vary based on factors like material granularity, moisture level, and terrain.
